On this date Caltrans OSM Quality Assurance (QA) Inspector, Kelly Leavitt, was present during the times noted above for observations relative to the work being performed.

Bay 14

This QA inspector performed MT of approximately 15% of an area that has been previously tested and accepted by ZPMC Quality Control (QC) personnel. This QA Inspector generated an MT report, for document number 08197, on this date. The member was identified as OBG-13AE. The weld designations reviewed are as follows:

SEG3007M-201, 206, 211, 216, 221, 226

SEG3007P-234, 239, 244, 249, 254, 259

SA3012A-109 ~ 119, 122, 143, 144, 147, 148, 151, 152, 155, 156, 159, 160, 163, 164,178

This QA inspector performed Magnetic Particle Inspection on Segment 13AE as per NWIT 08197 Item 1. This QA inspector identified several locations where Visual and MT indications have been noted, due to ZPMC not having labor personnel to grind these locations on this date to defer from relevant and non-relevant indications, these areas have been turned over to day shift personnel to have ZPMC grind these areas that have been clearly marked.

Unless otherwise noted, all work observed on this date appeared to generally comply with applicable contract documents.
